

EVENT INTRODUCTION

Singapore is joining the Globe-athon coalition again this year!!

<https://www.facebook.com/Globeathon> &

<https://www.facebook.com/Fightagainstwomenscancer/>

The Society for Colposcopy & Cervical Pathology of Singapore (SCCPS) would like to continue to reach out and educate more women and would like to target mothers of young girls, university students and young working women through this Globe-athon. We hope that by conducting this event to generate awareness on the importance of the dual strategy of prevention via screening and vaccination for cervical cancer and also raise awareness on ovarian cancer. Every year worldwide and in Singapore, we see women in their prime of their life succumbing to women's cancer leaving behind children without mothers and families without daughters or wives. This is especially sad for women's cancer like cervical cancer which can be totally prevented. In surveys conducted recently, a large proportion of our Singapore women remain unaware of the cervical and ovarian cancer and their current available prevention strategies.

This year, like last year, SCCPS is planning an indoor 1 day event with a **3 hour** exercise program for women on the **20th of November @ the OCBC Arena**. Activities include Zumba, KPOP Xercise and Piloxing integrated with public talks by our doctors on Cervical Cancer : screening with Pap smear and cytology, prevention through vaccination; and Ovarian Cancer: the silent killer, prevention and new treatment strategies. Target audience will be the public. There will be 4 talks in total: 2 in English, and 2 in Mandarin.
